

ARGUS Software Surpasses 600 Customer Milestone for ARGUS Enterprise

Global adoption continues as customers rely on ARGUS Enterprise as the standard for commercial real estate asset management

TORONTO (May 12, 2015) - ARGUS Software Inc. ("ARGUS"), a subsidiary of Altus Group Limited ("Altus Group") (TSX: AIF), is pleased to announce it has surpassed the 600 customer milestone for its flagship ARGUS Enterprise ("AE") platform – the world's most comprehensive asset and investment management software for commercial real estate.

Over the past two years, AE's strong momentum has continued to grow with the adoption of thousands of users. Of the 600+ customers, 35% are now located outside of the US, demonstrating a significant expansion of AE into global markets. Many of the industry's largest commercial real estate organizations rely on AE including investors, owner operators, lenders, portfolio managers, and 8 of the 10 largest real estate service providers. By incorporating the world's most widely-used standard valuation methodologies, AE offers a single unified platform to allow commercial real estate organizations to manage, analyze and report on their world-wide assets.

"Our customers are dealing with growing market pressures including the increasing speed of deal cycle times, requirements for enhanced data and insights, and the need to operate globally with greater portfolio visibility. Whether our customers are in Europe, Asia or the Americas, they are relying on AE as the standard for transacting and managing commercial real estate assets," said Mike Abramsky, President of ARGUS Software.

ARGUS Enterprise

The AE platform brings significant value to a client's asset and investment management process, offering the following business benefits:

- **Global valuation:** incorporates the world's most widely-used standard valuation methodologies including DCF, Traditional Valuation and Australian Capitalization. This global functionality allows users to roll-up and consolidate analysis and reporting in their standard(s) of choice;
- **Broadest investment visibility:** ability to produce advanced forecasting and projected returns by creating scenarios based on market conditions, both at global and country-specific levels, and powerful reporting capabilities using local currency, rate and market assumptions;
- **Integrated platform:** valuation, asset management and budgeting in a single platform allowing for greater scalability, data integration, and transparency while providing proven integration with popular client infrastructure.
